

Buddy AI

AI conversational bot for Buddy Program

Github Link : <https://github.com/Gaurav-71/Buddy-AI>

Hello!

I am Gaurav V

I am a 3rd year computer science student
studying at Ramaiah Institute of Technology.

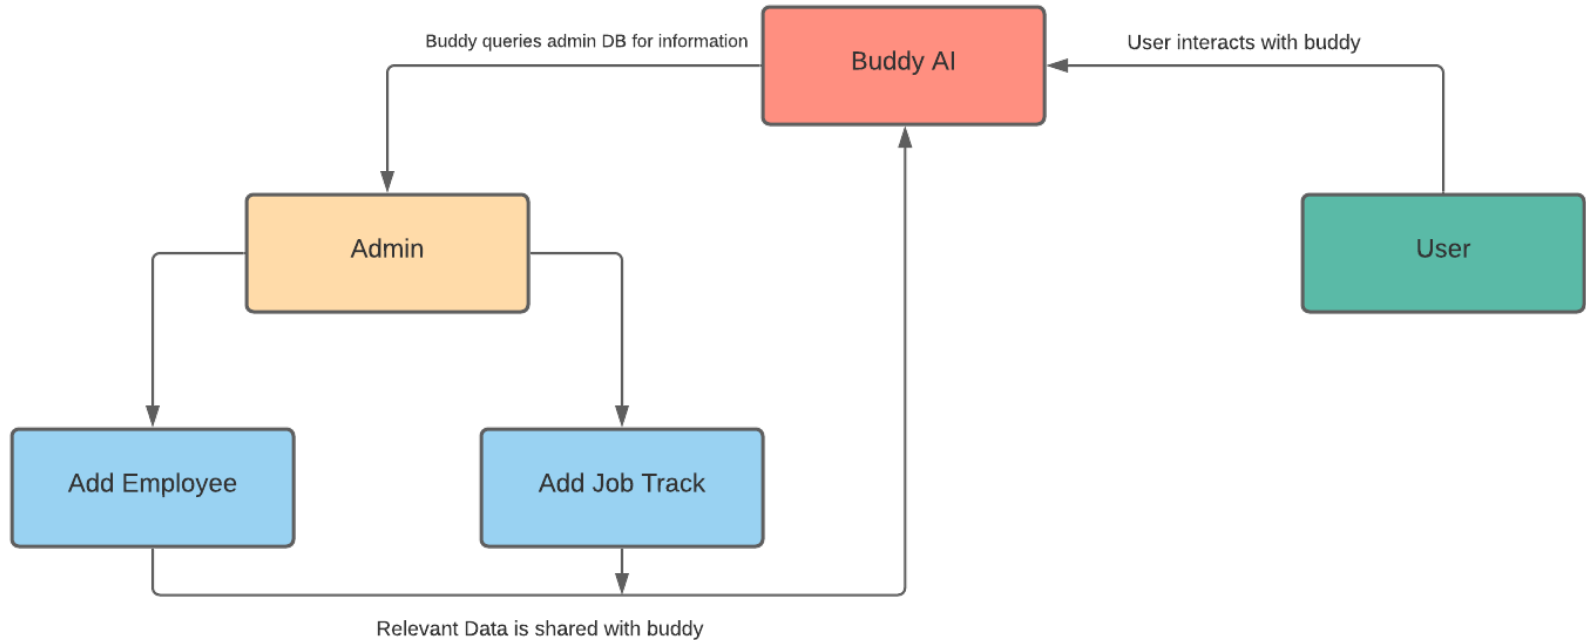

Problem Statement

The onboarding process for a new employee at a new organization can be intimidating and overwhelming. Innovate and create an interactive and friendly AI conversational bot that acts as a buddy for the new employee and provides a smooth transition into the new organization and team.

A Comprehensive Solution

Features

- Help a new employee onboard the company
- Accept relevant documents from the user
- Help the user attend orientation and trainings
- Connect with teammates (via email, slack etc.)
- Find nearby restaurants, coffee shops and much more
- Best buddy to ask anything about Unisys
- Helps a new employee settle into the new workplace and surroundings

Technologies used

- Frontend : HTML, SCSS
- Backend : Flask
- Packages : Selenium, Flask, UUID, googlesearch

Benefits

- Simplifies the onboarding process
- Single point of contact
- Friendly and easy to use
- Has answers to all your questions
